**Certification:** The ZARU contract meets all stated design and security objectives at time of review.

## Security review

- **Supply:** Fixed at deployment; no mint authority exposed.
- **Privileges:** No public access to restricted functions; owner role scoped.
- **Events:** Transfer/Approval emitted correctly.
- **Reentrancy:** No external calls before state updates.
- **Failure modes:** Invalid operations revert deterministically.

## Operational controls

- **Key management:** Segregated keys; multi-sig recommended.
- **Monitoring:** Alerts for large transfers and abnormal activity.
- **Change management:** Ownership changes announced via official channels.

## Risk disclosures

- **Market risk:** Volatility and liquidity fluctuations.
- **Counterparty risk:** Exchange and integration dependencies.
- **Regulatory risk:** Jurisdictional changes may affect access.

## Certification

The undersigned certify that the ZARU contract has been reviewed under the methodology described, and no critical or high-severity
