

ZARUverse Ecosystem Audit — Report 3

Makese Holding Ltd. — Formal Certification

Version: 1.0 Date: 15.9.2025

Executive summary

This audit evaluates multi-token behavior across the ZARUverse ecosystem, including MAK1, DMD, and ZARU. Integration tests confirm safe interactions, privilege isolation, and consistent event propagation. No critical vulnerabilities were identified.

Integration scope

- **MAK1:** Base token for DAO voting and staking
- **DMD:** Premium token for gated access and rewards
- **ZARU:** Ecosystem token for liquidity and governance

Findings summary

Severity	ID	Title	Status
Critical	—	No critical issues	Closed
High	—	No high-severity issues	Closed
Medium	E-M01	Cross-token event sync	Mitigated
Low	E-L01	Metadata alignment	Acknowledged
Info	E-I01	Gas harmonization	Deferred

Certification: All contracts in the ZARUverse ecosystem operate safely under integration conditions.

Certification

The undersigned certify that the ZARUverse ecosystem contracts have been reviewed under the methodology described, and no critical or high-severity vulnerabilities were identified at the time of assessment. This certification is informational and non-solicitational.
