

DMD — Diamond Token

Whitepaper — BNB Chain (BEP-20)

Version: 1.0 Updated: 2025

Executive summary

DMD is the official BEP-20 Diamond Token by Makeese Holding Ltd. It provides liquidity roles, access permissions, and governance signal across the ZARUverse while preserving brand integrity and measurable scarcity.

Token definition

Name

Diamond

Symbol

DMD

Standard

BEP-20

Utilities

- **Access:** Token-gated products, curated drops, and allowlists.
- **Liquidity role:** Participation in pools and reward lanes.
- **Governance signal:** Directional voting weight in designated proposals.
- **Synergy:** Works alongside MAK1 and ZARU in composite programs.

Tokenomics

Allocation	Percentage	Purpose
Liquidity	35%	Pool depth, stability, and market access
Public	25%	Open distribution and participation
Treasury	20%	Reserves and integrations
Incentives	10%	Staking and ecosystem rewards
Partnerships	10%	Listings, co-marketing, collaborations

Market integrity

- **LP guardrails:** Liquidity managed under internal thresholds.
- **Listings:** Exchange integrations aligned with brand policy.
- **Disclosures:** Contract address and supply parameters must be cited in full.

Security controls

- **Immutable supply cap:** No mint beyond deployment.
- **Key management:** Segregated operational roles with least privilege.
- **Monitoring:** Automated alerts for anomalous activity.

Risk disclosures

- **Volatility:** Token price and liquidity can vary materially.
- **Integration risk:** Third-party services may fail or change policies.
- **Regulatory:** Access may be restricted under local laws.

Brand position

DMD is solidity and signal: a refined asset that travels across channels without diluting Makese's luxury identity. Communications adhere to precision, verified links, and consistent naming.
